

TEST KIT (Noburst -100/Super Noburst)

NOBURST® Test Kit strips provide the most economical and rapid field test for the FREEZE POINT and CORROSION protection of NOBURST nontoxic antifreeze solutions.

NOTE: NOT to be used with NOBURST AL

DIRECTIONS:

- 1.** Remove a test strip from the foil package.
- 2.** Fully immerse the end of the strip containing the color pads in the NOBURST solution for 1-2 seconds and remove. Shake the excess fluid off the strip. Allow 15 seconds for color development.
- 3.** Determine the concentration of NOBURST in the solution by comparing the color of the pads with the color chart that is included in the kit.
- 4.** If the Freeze Point or the inhibitor condition is not at the desired levels. See the instructions for adding NOBURST antifreeze and or Inhibitor Boost.
