Installation:

Noble Company FreeStyle Linear Drain™ is suitable for use with tile showers. The shower drain and the waterproofing membrane must be installed in accordance with the manufacturer’s published instructions, the applicable codes and Tile Council of North America Guidelines.

Ceramic tile, if used, must comply with ANSI A137.1.

Waterproofing membrane must comply with the applicable code or ANSI A118.10.

Models:

Noble Company FreeStyle Linear Drain™ 800 or 900 Series is composed of three parts:

1. A polygon shaped drain body made of polyvinyl chloride (PVC) or acrylonitrile butadiene styrene (ABS).
2. A clamping collar made of stainless steel.
3. A removable strainer made of stainless steel.

The drain body is fabricated from a single piece of ABS or PVC and with no welds. The drain body is flat on the bottom and contains a sloped channel to the vertical waste pipe. The waste pipe is chemically welded to the drain body at the jobsite. Connections to the drain must be made with the appropriate cement for the drain material and be completed following applicable codes. Drain bodies are available in different lengths to accommodate different sized areas.

An ANSI A118.10 approved membrane must be fastened to the top surface of the drain with a clamping collar. This is attached at the jobsite.

The strainer is secured with three screws to the drain body. It is adjustable in height to match the finished surface height. Strainers are available in different designs and sizes to match the drain bodies.

Additional Listee: Sioux Chief

Series 800 or 900 Linear Drain

Conditions of Listing:

1. Shower floors must be sloped toward the drain.
2. Where each shower space is not provided with an individual waste outlet, the waste outlet must be located and the floor pitched so that waste from one shower does not flow over the floor area serving another shower.
3. Application is limited to ceramic tile, decorative concrete, granite slab and dimension stone installations on floors, and to use as shower sub-pans or lining.
4. Waterproof membrane must be a Noble Company model as described in ICC-ES PMG-1059, or an approved equivalent. Documentation of the waterproof membrane’s conformance with ANSI A118.10 must be supplied to the code official when requested, or the membrane must have a current listing by ICC-ES.
5. Where installation is below the floor decking, the drain can be oriented parallel or perpendicular to any floor joists. Cutting or notching must be in accordance with the applicable code.
6. The Noble Company FreeStyle Linear Drain is under a quality control program with an annual inspection conducted by ICC-ES.
