WHAT YOU WILL LEARN

Our 1-hour CES HSW approved courses focus on installation methods and interior waterproofing systems that comply with industry guidelines and prevent failures. Examine moisture/vapor transmission and crack isolation, as well as ancillary design elements that contribute to the success of your waterproofing detail. The real-world examples presented are timely, practical, and enable you to effectively implement the knowledge gained.

Jim Medina

AIA Allied Member, CSI

Director of Architectural Services, Noble Company

Jim's background in construction stems from over 30 years in the industry. He started out as a contractor and worked with general contractors as a Project Coordinator and Project Manager. In 2004, while working for Wynn Design and realizing that flooring was his true passion, Jim earned his certification in Flooring Forensics. This gave him a different outlook on every project and approach to installations. This unique insight of why floors fail in residential, commercial, and hospitality helped Jim to analyze and solve some of the most perplexing failures. His mission is to educate design professionals on the current and future approaches to the changes in the industry and to find out the answers to why installations fail.
