

NOBURST® RTU Premixed Antifreeze

Ready For You, Ready To Use

Water quality concerns are no longer limited to our drinking water. Whether it's well or municipal water with high total hardness, boiler equipment manufacturers are now more cautious than ever. When mixing propylene glycol on-site, poor water quality can lead to long-term damage to heating systems. Noble Company is addressing those concerns and is pleased to introduce a new line of ready-to-use antifreeze that eliminates these water quality concerns.

Designed to be introduced directly into systems with no on-site dilution, NOBURST RTU products are factory premixed with deionized water ensuring no mineral content or hardness levels and the elimination of chlorides, which are second only to oxygen as a leading cause of heating system corrosion. NOBURST RTU blends are available in 30, 35, and 40% propylene glycol concentrations with no minimum order quantity.

For more information about this or any Noble Company product, visit our website at www.noblecompany.com, or contact us at 800-878-5788.

NOBURST RTU Premixes Available:

NOBURST RTU30 30% PG

NOBURST RTU35 35% PG

NOBURST RTU40 40% PG
